Introduction

ABC Company - Managed IT Service Provider

ABC Company is a managed IT service provider that provides application, network, and system management services to large enterprises which need third party IT support. ABC Company helps enterprises without IT professionals to improve day to day operations. ABC Company mainly includes 4 sections,

1. Human Resources Section
2. Customer Services Section
3. Internal Projects Section
4. Marketing Section

This document contains how the four main sections separately works according to the producer consumer model. Four sections are having their own tasks to follow the producer consumer model. These sections are providing independent services for their consumers.

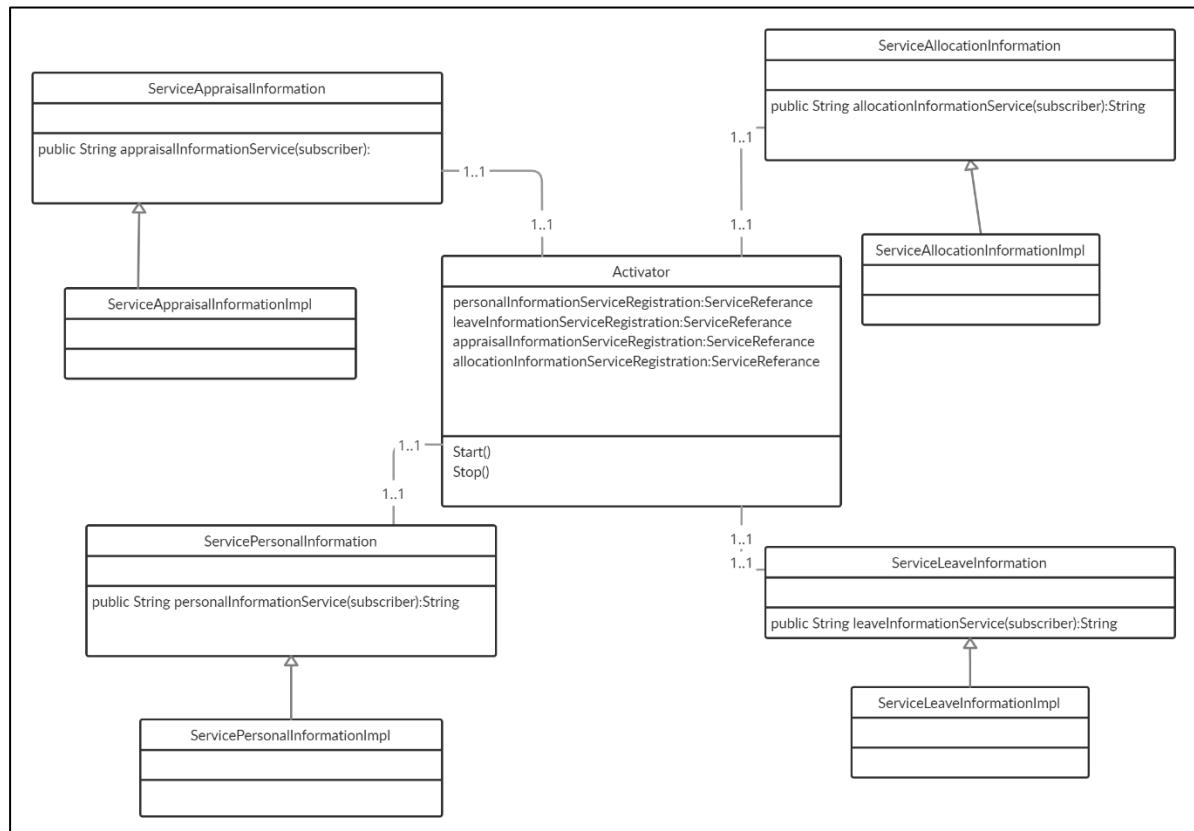

ABC Company - Sections

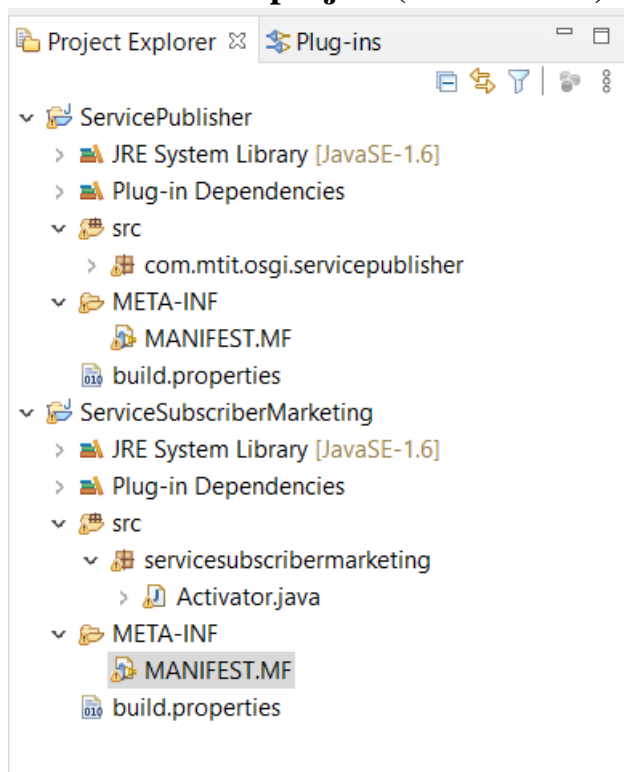

ABC Company – HR division (IT18210002)

The HR division of ABC company provides Personal information service, Leave Information service, Allocation information service and Appraisal information service for other divisions of the company. The Marketing division of the ABC company subscribes the personal information service and the Leave information service.

Customer Services Section (IT18540536)

ABC Company is providing application, network, and system management services to large enterprises which need third party IT support. So, the heart of the company depends on the customer services. Depend on the customer, ABC company controls the service list which need to allocate to specific customer. ABC Company provides customer services such as,

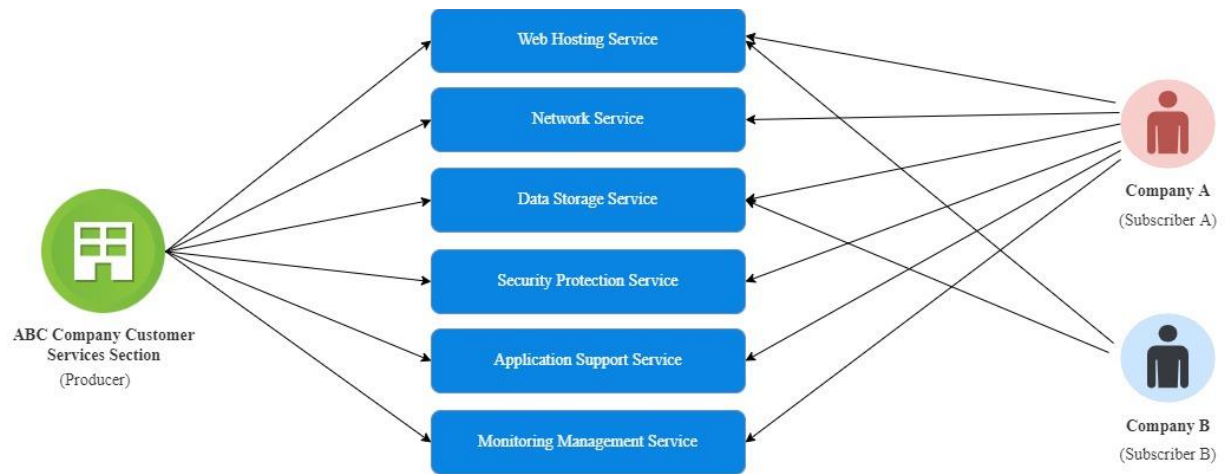

1. Web hosting service
 2. Network service
 3. Data storage service
 4. Application support service
 5. Security & protection service
 6. Monitoring & management service
- Company A is one of the old clients of ABC Company. It consumes all services that are provided by ABC Company.
 - Company B is one of the new clients of ABC Company. It consumes only the Web hosting service and the Data storage service that is provided by ABC Company.

Proposed solution contains three separate projects. Assume **Service Publisher** project as the ABC Company Customer Services Section which acts as the producer. There are two separate projects for Company A and Company B which acts as consumers. Assume **Service Subscriber A** is for Company A and **Service Subscriber B** is for Company B.

Activate Windows

Marketing Section (IT18218572)

According to the OSGi framework, we created an ABC software Company to provide the IT solution for the customer, so the Marketing Service improves for we publish our requirement in our Portal, and it hires IT, HR and Sales. In our system product and consumer are Marketing Sector and Undergraduate. As the consumer needs to submit an application there, that portal.

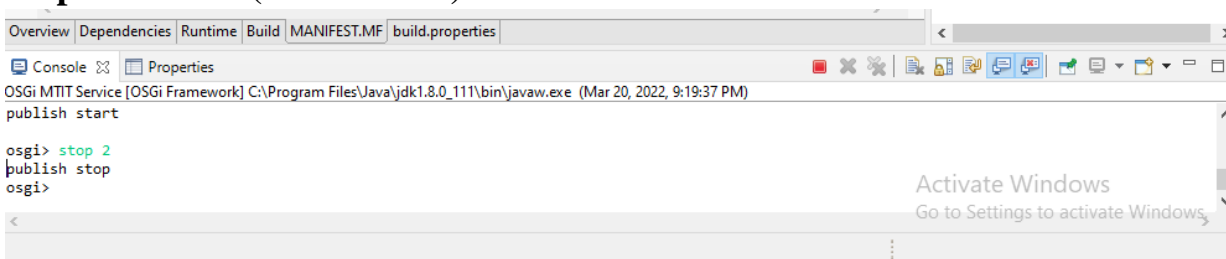

Service Status (IT18218572)

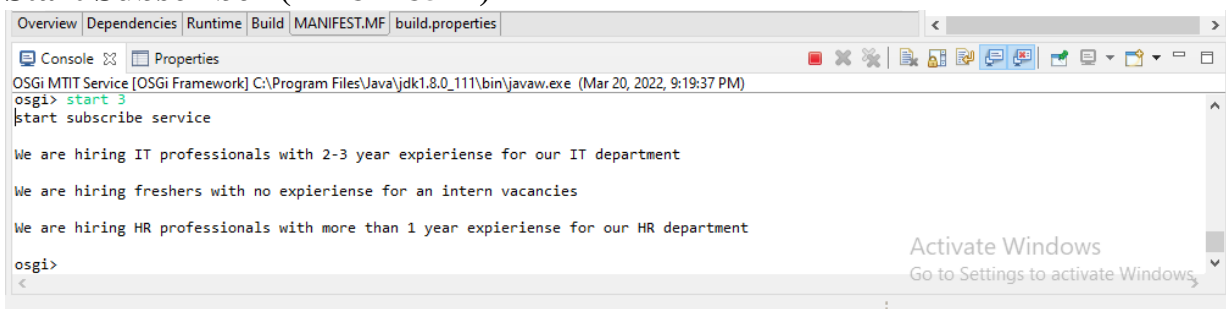

Start Publisher (IT18218572)

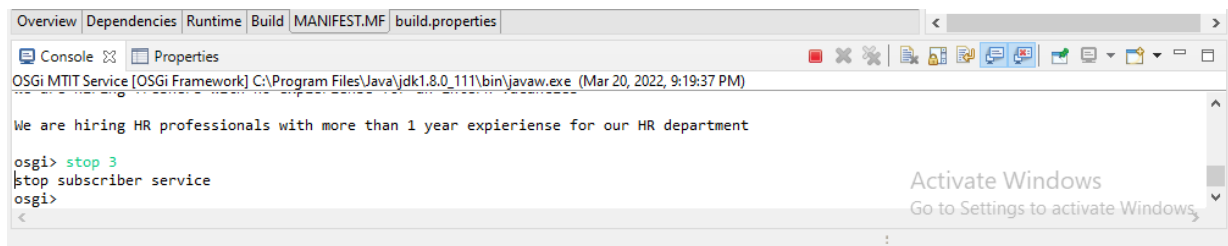

Stop Publisher (IT18218572)

Start Subscriber (IT18218572)

Stop Subscriber (IT18218572)

The screenshot shows the Eclipse IDE console with the following content:

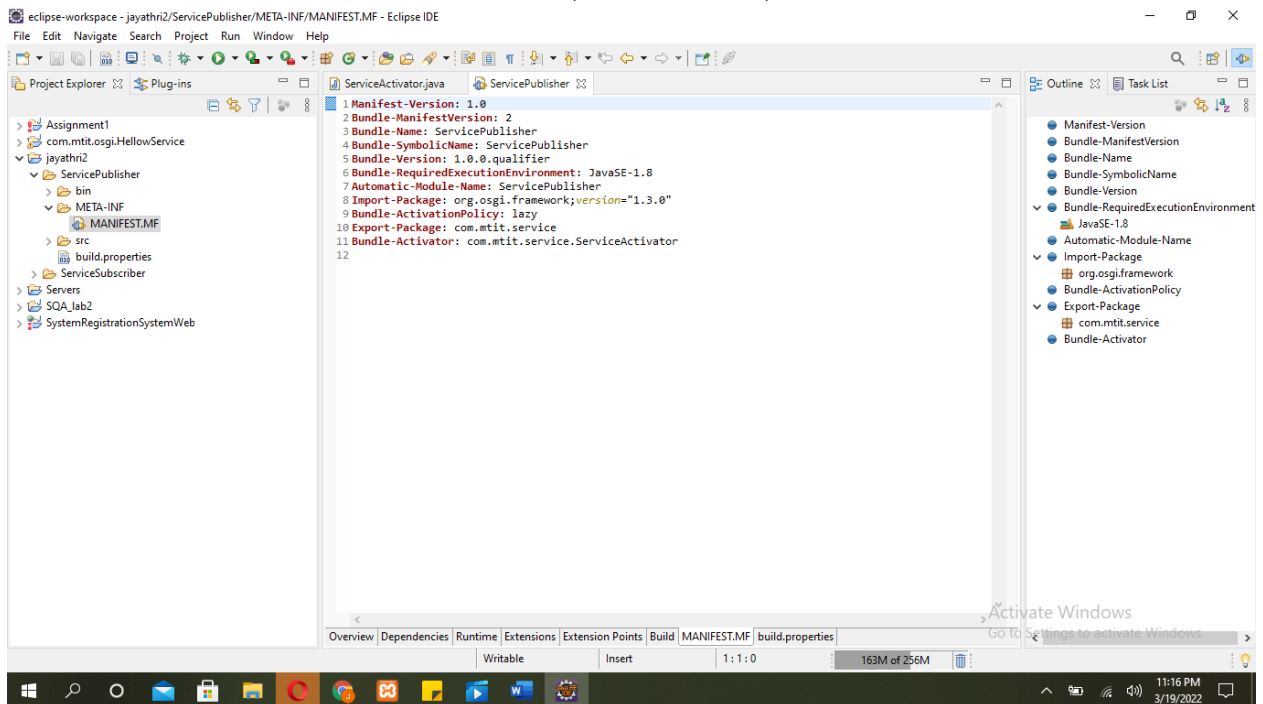

```
OSGi MTIT Service [OSGi Framework] C:\Program Files\Java\jdk1.8.0_111\bin\javaw.exe (Mar 20, 2022, 9:19:37 PM)

We are hiring HR professionals with more than 1 year experience for our HR department

osgi> stop 3
stop subscriber service
osgi>
```

An "Activate Windows" watermark is visible on the right side of the console.

Service Producer MANIFEST.MF (IT18218572)

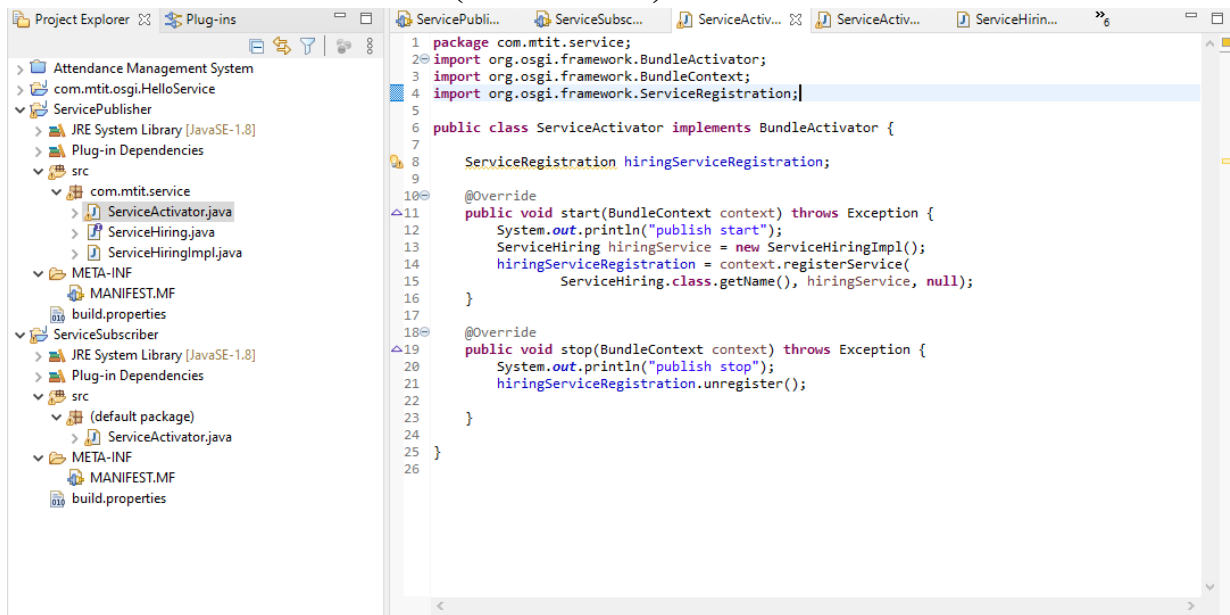

The screenshot shows the Eclipse IDE with the "ServicePublisher" project selected. The "MANIFEST.MF" file is open in the editor, displaying the following content:

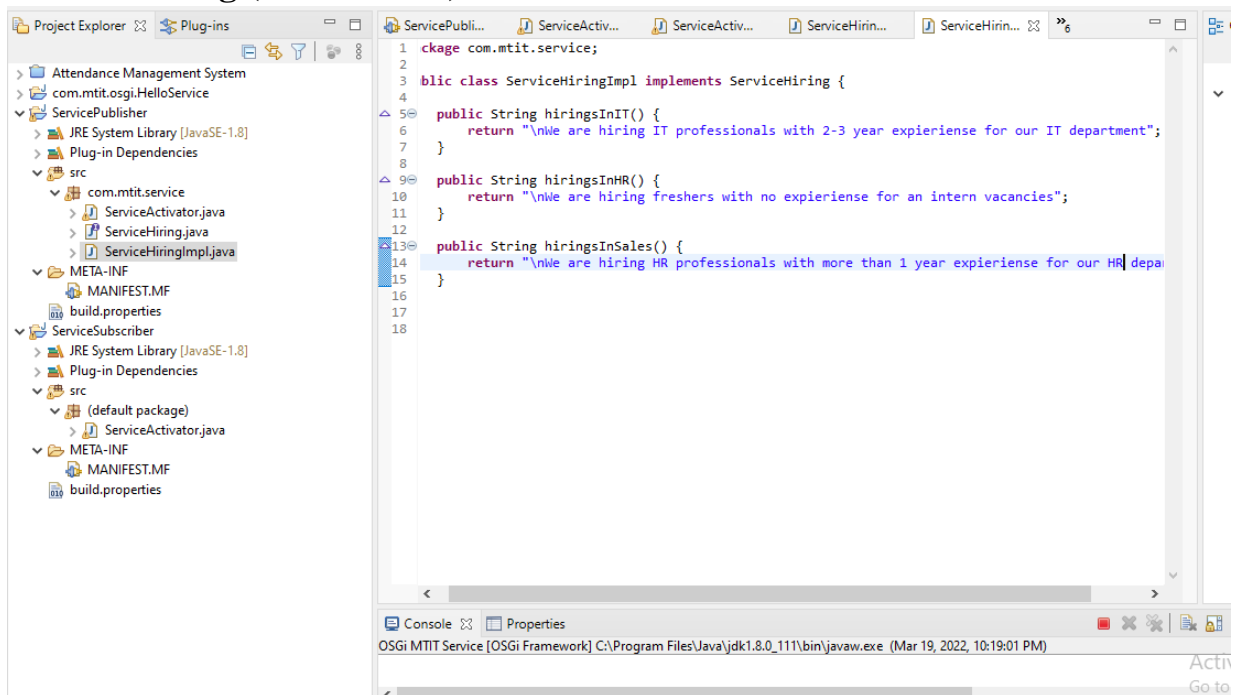

```
1 Manifest-Version: 1.0
2 Bundle-ManifestVersion: 2
3 Bundle-Name: ServicePublisher
4 Bundle-SymbolicName: ServicePublisher
5 Bundle-Version: 1.0.0.qualifier
6 Bundle-RequiredExecutionEnvironment: JavaSE-1.8
7 Automatic-Module-Name: ServicePublisher
8 Import-Package: org.osgi.framework;version="1.3.0"
9 Bundle-ActivationPolicy: lazy
10 Export-Package: com.mtit.service
11 Bundle-Activator: com.mtit.service.ServiceActivator
12
```

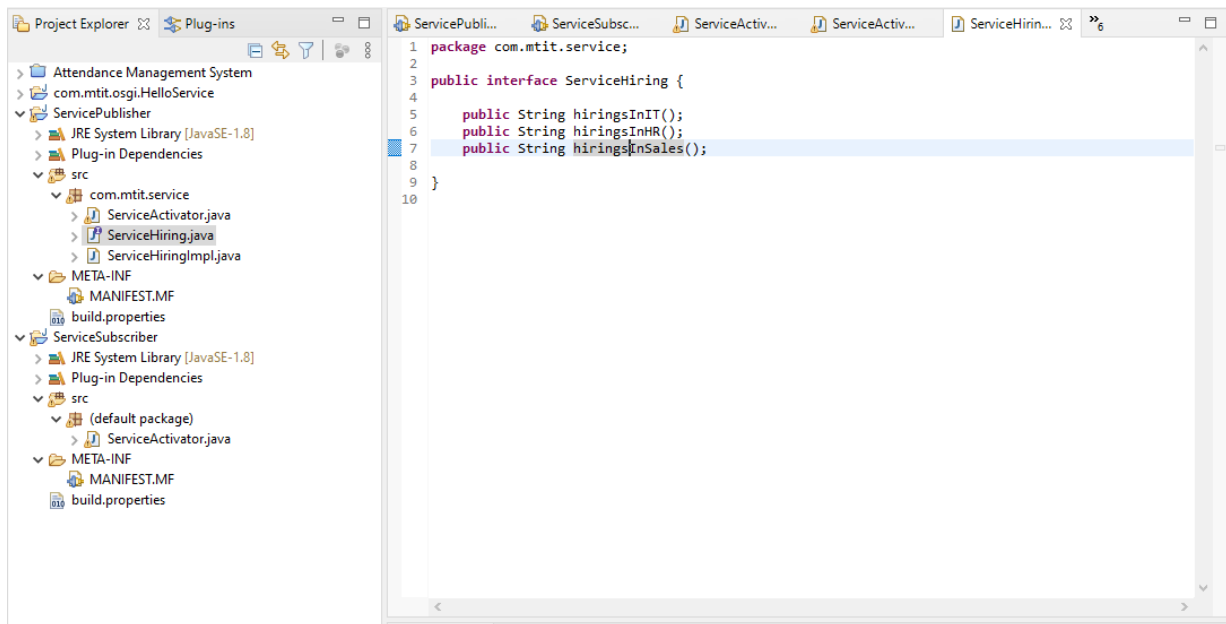

The "Project Explorer" on the left shows the project structure, including "META-INF" and "MANIFEST.MF". The "Outline" on the right lists the manifest entries. An "Activate Windows" watermark is visible at the bottom right.

Internal Projects Section (IT18062120)

This is really a plug-in project where there are several plug-ins which will connect together, also, this has a producer to produce services and there are consumers who are consuming the services and make the services available to the user. We have done an IT Product development System for ABC Company according to OSGi framework. Marketing, Internal Project service, HR and providing Service are the producers/services of this system.
